Important note!

The formulas above give an indication of the maximum capacity. If you wish to add a bar, stage, dance floor, etc., we will have to account for some extra space. Our Project Managers are always at your disposal to give advice and work out a custom made proposition for you.

DESCRIPTION

Stretch tents have a unique flexibility, as they can be set up free-standing or can easily be attached to all kinds of walls/buildings to extend a terrace or outdoor space. Trees, bushes, lighting poles or other obstacles can easily be integrated into a set-up.

Stretch tents are available in an extensive range of sizes and shapes.

Organic stretch tents are modular and can be interconnected. To make the connected tents waterproof, a gutter can be installed.

TECHNICAL DRAWING

The standard set-up for a Stretch tent is an open configuration in order to use as much space as possible. In the case of an 9 x 10 m tent, the four corners will be pulled down, creating a cosy indoor area.

OTHER CONFIGURATIONS

A great advantage of Stretch tents is that there are endless possibilities regarding the set-up. In case of an 9 x 10 m Stretch tent, there is also the option of closing one, two or three sides of the tent. The pictures show some examples of a half open configuration.

WOODEN CASSETTE FLOORING

Wooden flooring provides extra comfort and creates a warm atmosphere in combination with the tents. We place natural wooden floors. Furthermore, we offer carpet covers, which come in a big variety of colors.

Our team is also specialized in installing flooring on locations with height differences.

BURLAP FINISH

WITHOUT FINISH

WITH FINISH

To cover up the open sides of the wooden cassette floors, we recommend finishing the floor with burlap in all places visible to the guests. Other finishing fabrics are possible upon request.
